There was discussion about response times and that they appeared to get longer over the last 6 months. McCulley indicated that the information in the report should show response time for the last 12 months and that would be more accurate. He noted that we are well under the national average for response times and that he was satisfied with it.

McCulley noted the difference between a priority one call (no red lights/sirens or driving through stop lights) as opposed to code 3 in which there is.

In response to the discussion about burglaries, McCulley noted that it is very standard for officers to bring packages up to residents' doors or ring their bells to let them know.
