Note: The data, figures, and information contained herein are provided as a courtesy to entities wishing to estimate the water use trends and characteristics of California Water Service's (Cal) customers in specific geographic locations. The data, figures, and information contained herein are generated from customized queries that are substantially distinct from Cal Water's normal retrieval processes. The data, figures, and information contained herein are not used by Cal Water for any official purpose, including, but not limited to, reporting to the California State Water Resources Control Board or the California Public Utilities Commission. The data Cal Water reports to the State Water Resources Control Board is based on the amount of water produced by Cal in a calendar month. Because the data, figures, and information contained herein are based on water consumption, measured by meter reads, which occur on varying days over the course of the month, the data, figures, and information contained herein will not exactly match the data Cal Water reports to the State Water Resources Control Board. Variations in the data, figures, and information month to month may be caused by a number of factors, including, but not limited to, variations in billing cycles and changes to the account status of customers. Cal Water makes no representation of the accuracy of the data, figures, and information contained herein, or their fitness for any particular purpose. Cal Water assumes no responsibility or liability for the use or misuse of the data and information contained herein.
